2. Internet Access and Habits	5
3. Internet at Home: Connection, Quality, Disruptions, and Affordability	21
4. E-Commerce, Mobile Payments and Verification Technologies	60
5. Generative AI Use	80
6. Social Media Use, Online Harassment and Harmful Content	95
7. Information Consumption: Media, News, Mis/disinformation and Amplification	122
8. Accessing Government and Politics Online	150
9. Sample Demographics	155

1

ABOUT THE RESEARCH

About the Research

OBJECTIVES

The purpose of the research is to identify trends in Canadian internet use, and to provide CIRA with topical information and analysis for use in white papers and CIRA's Internet Factbook, which support CIRA's position as an internet innovator and global thought leader.

Topics in 2024 include:

- Internet access and habits
- Internet at home: connection, quality, disruptions, and affordability
- E-commerce
- Mobile payments and verification technologies
- Generative AI use
- Social media use, online harassment and harmful content
- Information consumption: media, news, mis/disinformation and amplification
- Accessing government and politics online

METHODOLOGY

A total of n=2,000 adult Canadian internet users (18+) were surveyed in March 2024 via an online panel methodology.

The total sample reported throughout is weighted proportionate-to-population by province. Unweighted sample sizes are shown. The total is also proportionate by age and gender.

Wherever possible, the 2024 findings are compared to the results from 2013-2023.

Note that, due to rounding, percentages may not sum to exactly 100%.

2

INTERNET ACCESS AND HABITS

NUMBER OF HOURS PER DAY SPENT USING THE INTERNET

Just under half (47%) say they spend 5+ hours online per day (consistent with 2023 and down from a high of 55% in 2021).

(previous phrasing) Which of these factors is usually **most important** to you when making a purchase from an online store instead of at a traditional store? Please select only one.

Base: Have made a purchase online in the last 12 months and had at least one important factor in Q37

COMFORT LEVEL WITH DIFFERENT TYPES OF TRANSACTIONS

In general, internet users are more comfortable making purchases on **Canadian** retail or government websites than on U.S retail websites. Expressed comfort in using mobile payment or digital wallet services is at 36% in 2024, down slightly from 40% in 2022 but up markedly since 2016.

Q43. Thinking about any concerns you might have about the security of your personal information when making online purchases, how comfortable are you or would you be with the following types of transactions? Please answer regardless of whether you have made this type of transaction in the past.

Base: Total sample

COMFORT LEVEL WITH DIFFERENT TYPES OF TRANSACTIONS
